Applications Engineer

U.S. Sensor is seeking an experienced application/design engineer to join our Technical staff. The successful applicant must possess a working knowledge of basic electronic theory and have the ability to become proficient in the technical aspects of our products. Previous thermistor (or other temperature sensor) experience and/or an EE degree is a plus. The applicant must possess excellent oral and communication skills to interface directly with our customers in product design and development. The individual will also interface with our Production and Quality engineers as well as assist in developing product cost estimates. If you possess the experience and knowledge required of this position, we invite you to send your resume with salary history to jobs@ussensor.com.
